

Getting Started - for Consumers

Welcome to the Atonomi Identity Registry Network! The product you just purchased has been built with Atonomi Identity Registry Network software embedded to help protect your device and keep your information secure. But to be protected, you first need to activate your device in the Atonomi Network.

Please follow the steps below before turning on your new device.

Here's how to Get Started:

1. Don't turn on your new device until Step 6.
2. You will need to use a computer to complete the activation process.
3. If you don't already have a digital wallet, please obtain the wallet of your choice, which you can download from <https://metamask.io>, <https://www.myetherwallet.com>, or from any other ERC20 wallet vendor. (If you already have a digital wallet you can skip to Step 6.)
4. You will need to establish an account with an online cryptocurrency exchange such as [Binance](#), [Bitfinex](#), [Kraken](#), or [other](#) popular exchanges, or use your existing exchange account.
Note: Establishing a cryptocurrency exchange account can take several days.
5. Once your cryptocurrency exchange account is active, you can use Ethereum to purchase Atonomi Tokens (ATMI) to pay for device activation.
6. On your computer, use your browser to go to the Atonomi website for Activation: <https://activation.atonomi.net>
7. Turn on your new device.
8. Follow the online instructions to enter your device ID and press the "Activate" button.
9. Congratulations! Your new device is now protected by the Atonomi Network.
